The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 12 April 2005.

DETAILED ACTION

Page 2

- 1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12 April 2005 has been entered.
- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Powell (US 2002/0000215 Al) in view of Griffin (U.S. 2,372,485) or Gerson (U.S. 2,586,528).

Application/Control Number: 10/735,955

Art Unit: 1772

Powell teaches a metal bushing for insertion into an opening in a plastic manifold in order to reinforce the opening for a fastener (abstract, Figure 9). Griffin (Figure 2) and Gerson (Figure 4) both teach forming indentations or grooves in bushings that mate with projections formed in the softer material that the bushing is inserted into in order to lock the bushing in place. The instant invention claims various shapes of grooves and indentations in a metal bushing that is inserted into a plastic hole, where the indentations and grooves mate with projections from the sidewalls of the hole. It would have been obvious to one of ordinary skill in the art to have formed indentations and grooves on the metal insert of Powell in order to better lock it into place within the plastic hole because of the teachings of Griffin or Gerson. Specific size and location of the indentations and grooves is taken as being within the ordinary skill of the art depending on the desired amount of interlock force. The examiner takes the foot portion (element 34) of Figure 9 and the bore (element 32) as being a continuous bore of with portions of two different diameters. Compression limiter (element 16) is fully inserted in the combined portions of the total bore.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claim 19 is rejected under 35 U.S.C. 102(b) as being anticipated by Amann et al. (U.S. 6,309,157).

Element 11 of Figure 1 of the reference is a plastic part (claim 8) with a fixing hole designed to receive an axial shaft with a projection (element 12) that can mate with a shaft. No particular weight is given to the shaft being annual or solid as the shaft being annular is an intended use in the instant claim and the structure of the reference is capable of functioning in the instant claimed intended use.

6. Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.

The new limitation of complete insertion is addressed in the above modified rejections. The nonanalogous art objection has been answered previously. Art Unit: 1772

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 571-272-1503. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR of Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
